

WEAR LINERS

Protecting your machines

Smiley Monroe's rubber Wear Liners offer materials processing equipment much greater protection from impact loading and corrosion - reducing downtime, expensive refits and workplace noise pollution.

Hoppers and chutes benefit from being fitted with custom **Wear Liners**, which provide wear resistance - so that the liner is the sacrificial element, not the machine structure itself.

Our in-house design engineers and production team can manufacture **Wear Liners** for you, no matter how complex the shape of your machine's hopper or chute. Smiley Monroe **Wear Liners** are supplied ready to fit with pre-moulded holes and rubber bungs for ease of installation and product longevity.

ADVANTAGES OF WEAR LINERS

- ✓ Protect hoppers and chutes
- ✓ Highly impact, cut and wear resistant
- ✓ Significantly reduce workplace noise pollution
- ✓ Designed in-house to suit your application
- ✓ Complex shapes are custom cut by our automated CNC machines
- ✓ Hot vulcanised, steel backed rubber
- ✓ Available in various sizes and thicknesses up to 100mm (4")
- ✓ Supplied ready to fit
- ✓ Can be branded
- ✓ Ideal for mobile crushers

INDUSTRIES

- Mobile Plant OEMs
- Quarrying
- Cement Works
- Ports
- Recycling
- Telescopic Conveyors
- Sand & Gravel
- Fertiliser/Potash
- Coal Handling
- Mining

APPLICATIONS

- Hoppers
- Chutes
- Storage Tanks
- Cyclones
- Sand Washing Plant
- Barrel Liners
