We are the global market leader in the production of highly customised conveyor belts for the mobile crushing, screening and recycling sectors - producing around 250 miles of endless conveyor belts annually.

Our superior standards of quality, delivery and aftersales support, combined with a 12 month manufacturer’s warranty, set us apart from the competition.

Every highly customised Endless belt is covered by a 12 month warranty and is branded with its own unique Smiley Monroe quality identification number (see photo overleaf) we can supply belts branded with your company’s logo, which corresponds with barcoded information electronically captured during the entire production process.

ADVANTAGES OF ENDLESS BELTS

- Manufactured to DIN 22102 and covered by a 12 month warranty
- Hot vulcanised - branded with a unique quality identification number for full traceability
- Produced in EP Multiply Flat & Chevron, Fabric-Breaker, Ripstop, Straight Warp and oil/heat/fire/frost resistant
- Available customised with hot moulded cleats, siderails, cross-cleats and as overband magnet belts
- Routinely quality tested in our in-house belt testing lab
- Superior quality and lower cost than open belts mounted and vulcanised in situ
- Belts can be supplied mechanically spliced (Zip Clip) ready for cold splicing and as open/cut lengths
ENDLESS CONVEYOR BELTS
Full traceability, fully customised

IN-HOUSE BELT TESTING LAB

Our Endless conveyor belts are routinely quality tested in our in-house belt testing lab, for abrasion resistance, tensile strength and adhesion levels of both the cover rubber and fabric.

Smiley Monroe can quickly and conclusively test the wear (abrasion) resistance, tensile strength and adhesion levels of the cover rubber and fabric of conveyor belts and rubber materials, to ensure conformity to DIN and ISO standards. Our dynamic tester simulates accelerated life of conveyor belts and splices - testing belt quality to its limits for: flex, durability, adhesion, stretch, joint types and tensile strength.

WORLD CLASS SUPPLY

As sole supplier of conveyor belts to many world class original equipment manufacturers (OEMs) - Including Powerscreen, Terex Finlay, Sandvik, McCloskey International, Metso, Keestrack, CDE Global, Telestack & Astec Industries – you are assured of the highest quality products and service.

SUPERIOR QUALITY

Manufactured in our 30,000 sq.ft production facility under controlled conditions and customized to suit your application, our Endless conveyor belts offer both superior quality and lower cost than open belts mounted and vulcanised in situ.
