

RIPSTOP BELTS

Rebar just met its match

Constructed with synthetic fabric plies and an additional reinforced steel wire mesh for excellent rip and puncture resistance, Ripstop conveyor belts are ideal for handling the harshest C&D materials in some of the most demanding crusher applications.

WHY RIPSTOP?

- ✓ Reinforced steel wire mesh for excellent rip and puncture resistance
- ✓ Longer belt life - outlasts EP fabric (multi-ply) belts
- ✓ Ideal for Construction and Demolition (C&D) waste materials e.g. rebar and concrete
- ✓ Suitable for use on machines fitted with overband magnets
- ✓ Can be joined by vulcanising or with mechanical fasteners

CONVEYOR BELT SELECTION CHART

	Ripstop	Smiley Monroe TOUGHFLEX®
Wear Resistance	Good	Excellent
Impact Resistance	Good	Excellent
Rip Resistance	Excellent	Good
Puncture Resistance	Excellent	Excellent
Cut Resistance	Good	Excellent
Small pulley diameters	Good	Excellent
Troughability	Good	Excellent

SPECIFICATIONS

Tensile Strength (N/mm)	Ply	Top/Bottom Covers (mm)	Standard Widths (mm)
EP500	3+1	8 + 2	800/900/1000/1200
EP630	4+1	6 + 2	1400

RIPSTOP CONSTRUCTION

APPLICATIONS

- Construction and Demolition (C&D) waste
- Crusher Collection Belts

Not suitable for conveyors fitted with metal detectors.

Smiley Monroe Toughflex® can be used as an alternative where there is no risk of longitudinal rips.
