

FLIP-FLOW SCREENS

For Reciprocating Action Screening

Through extensive product development, we have engineered specialist Flip-Flow screens for reciprocating action screening, ideal for handling troublesome damp, sticky materials.

When you need application-specific expertise, you can benefit from our 35 years of accumulated knowledge and experience in sectors as diverse as aggregates, coal handling and recycling & waste management.

Our rubber and polyurethane synthetic screen media deliver low cost per ton and minimal maintenance, while giving efficient and trouble-free screening and separation. We produce a range that allows selection based on many criteria, from existing deck type to budget and application - supported by a high quality selection of screen accessories including capping rubber, rubber-covered side tensioning plates and polyurethane nozzles.

WHY FLIP-FLOW?

- ✓ Self-cleaning
- ✓ Designed with maximum open area for optimum screening
- ✓ Manufactured from polyurethane for maximum wear life and resistance to constant flexing
- ✓ Supplied with square or slotted apertures to suit your application
- ✓ Pre-punched with holes to suit your fixing bolts/studs

APPLICATIONS

- Plastics & Paper Recycling
- Cement Dust
- Top Soil
- Sand & Gravel
- Trommel Fines
- Coal & Coke Handling
