

CONVEYOR BELT OPTIONS

Know the difference

ENDLESS BELT

READY TO FIT

A finished length of conveyor belt with a hot (vulcanised) splice forming a continuous loop.

Note: Customer provides endless length measurement.

PREPARED BELT

SPLICED & READY TO VULCANISING

A measured length of conveyor belt with overlapping, spliced, prepared ends ready for hot or cold splicing (vulcanising).

Note: The customer provides an endless length measurement but does not need to add anything to their measurement to account for the splice overlap, as Smiley Monroe will handle the extra material.

CUT LENGTH BELT

READY TO PREPARE

A length of conveyor belt with square ends that includes a length allowance (overlap) for preparing and hot splicing (vulcanising).

Note: Customer provides endless length measurement but does not need to add anything to their measurement to allow for the splice overlap, as Smiley Monroe will account for the extra material. Or customers can provide head and tail pulley diameters and centre-to-centre distance between pulleys.
